

New PARTcommunity plugin gives CorelCAD users access to Millions of 3D and 2D CAD models

Free plugin makes it easy to access CADENAS 3D CAD manufacturer catalogs directly within CorelCAD

Germany, Augsburg, 7th July 2016. CADENAS announces the introduction of the PARTcommunity plugin that gives CorelCAD™ users access to millions of free CAD models from hundreds of renowned manufacturers. With PARTcommunity, CorelCAD users can easily insert CAD models as blocks with attributes into their CorelCAD designs in 3D or a selection of 2D views. The PARTcommunity plug-in is now available free to CorelCAD 2015.5, CorelCAD 2016 and CorelCAD 2016.5 registered users at www.corelcamarket.com.

Integrated directly into the CorelCAD user interface, the PARTcommunity plugin enables users to search, select and then customize models for their particular project from a variety of renowned, international manufacturers catalogs. In addition to a wide selection of free content, PARTcommunity also gives CorelCAD users access to premium, paid-for standardized CAD models which are independent of specific manufacturers, ideal when responding to a call for tenders.

“We are pleased to announce our new PARTcommunity plugin for CorelCAD, which will enable engineers to make their design processes in an even more time-saving fashion”, says Jürgen Heimbach, CEO of the CADENAS GmbH.

Compatible with CorelCAD 2015.5 and higher, the free PARTcommunity plugin is available through the Graebert Market for CorelCAD at www.corelcamarket.com. The PARTcommunity plugin for CorelCAD was developed by the software manufacturer CADENAS GmbH in Augsburg in cooperation with the Graebert GmbH in Berlin.
